

Accessibility Report – DataGrid Component

Environment

Screen Reader: NVDA
Browser: Microsoft Edge
OS: Windows

Testing Scope

The DataGrid component was tested for keyboard navigation, ARIA grid semantics, screen reader announcements, focus management, and automated accessibility violations using Storybook a11y addon (axe-core).

Results Summary

- Keyboard-only navigation: Supported
- ARIA roles and properties: Implemented
- Focus management: Working as expected
- Automated axe-core violations: 0
- Screen reader announcements: Row and column context announced correctly

Automated Test Evidence

The following screenshot shows the Storybook Accessibility panel confirming that no accessibility violations were found during automated testing.
