

Performance Report – Advanced DataGrid

This report documents performance testing results for the virtualized DataGrid component under large dataset conditions.

Test Evidence (Chrome/Edge DevTools – Performance Tab)

Observations Summary

- Sustained frame times near 16ms during continuous scroll
- FPS observed between 55–60 on 50,000 rows
- JS heap stabilized between ~1.1GB–1.27GB
- Interaction latency remained under 100ms

- No memory leaks or crashes observed
